

Monthly Indicators

April 2023

New Listings were down 25.6 percent for single family homes and 12.0 percent for townhouse-condo properties. Pending Sales landed at 219 for single family homes and 80 for townhouse-condo properties.

The Median Sales Price was down 1.9 percent to \$609,000 for single family homes but increased 6.4 percent to \$430,750 for townhouse-condo properties. Days on Market increased 63.2 percent for single family homes and 41.9 percent for townhouse-condo properties.

Housing inventory remains tight nationwide, with only 980,000 units available for sale heading into April, a 5.4% increase from one year earlier, although the number of homes for sale is down compared to the same period in 2019, prior to the pandemic. The lack of existing inventory continues to impact home sales, and with only 2.6 months' supply of homes at last measure, competition for available properties remains strong, especially in certain price categories, with multiple offers occurring on about a third of properties, according to NAR.

Housing Affordability Index

This index measures housing affordability for the region. For example, an index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.

| Affordability Index | Single Family | Year-Over-Year Change | Townhouse- Condo | Year-Over-Year Change |
|---------------------|------------------|--------------------------|---------------------|--------------------------|
| May-2022 | 50 | -31.5% | 74 | -22.9% |

Inventory of Active Listings

Glossary of Terms

A research tool provided by the Colorado Association of REALTORS®

| New Listings | A measure of how much new supply is coming onto the market from sellers (e.g., Q3 New Listings are those listings with a system list date from July 1 through September 30). |
|--------------------------------|---|
| Pending Sales | A count of all the listings that went into Pending status during the reported period. Pending listings are counted at the end of the reported period. Each listing can only be counted one time. If a listing goes into Pending, out of Pending, then back into Pending all in one reported period, this listing would only be counted once. This is the most real-time measure possible for home buyer activity, as it measures signed contracts on sales rather than the actual closed sale. As such, it is called a "leading indicator" of buyer demand. |
| Under Contract Activity | A count of all listings Under Contract during the reported period. Listings that go Under Contract are counted each day. There is no maximum number of times a listing can be counted as Under Contract. For example, if a listing goes into Under Contract, out of Under Contract, then back into Under Contract all in one reported period, this listing would be counted twice. |
| Sold Listings | A measure of home sales that were closed to completion during the report period. |
| Median Sales Price | A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point. |
| Average Sales Price | A sum of all home sales prices divided by total number of sales. |
| Percent of List Price Received | A mathematical calculation of the percent difference from last list price and sold price for those listings sold in the reported period. |
| Days on Market Until Sale | A measure of how long it takes homes to sell, on average. |
| Housing Affordability Index | A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and median income by county. |
| Active Listings | A measure of the number of homes available for sale at a given time. The availability of homes for sale has a big effect on supply-demand dynamics and home prices. |
| Months Supply of Inventory | A measure of how balanced the market is between buyers and sellers. It is expressed as the number of months it would hypothetically take to sell through all the available homes for sale, given current levels of home sales. A balanced market ranges from 4 to 7 months of supply. A buyer's market has a higher number, reflecting fewer buyers relative to homes for sale. A seller's market has a lower number, reflecting more buyers relative to homes for sale. |
