Monthly Indicators

June 2021

New Listings were up 1.3 percent for single family homes but decreased 16.4 percent for townhouse-condo properties. Pending Sales landed at 353 for single family homes and 95 for townhouse-condo properties.

The Median Sales Price was up 12.6 percent to \$506,750 for single family homes and 12.6 percent to \$354,000 for townhouse-condo properties. Days on Market decreased 35.8 percent for single family homes and 37.0 percent for townhouse-condo properties.

The increase in sales prices comes with a slight decline in existing home sales nationwide, as homebuyers struggle with declining affordability amid a lack of inventory, forcing some buyers to simply wait it out in hopes of more inventory and less competition. Meanwhile, home builders are trying to meet the increased market demand, with housing starts up 3.6% in May from April, according to the Commerce Department. As we ease into new routines and look forward to a post-pandemic future, one thing remains certain: America desperately needs more homes.

Housing Affordability Index

This index measures housing affordability for the region. For example, an index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.

June

Year to Date

Affordability Index	Single Family	Year-Over-Year Change	Townhouse-Market	Year-Over-Year Change

Year to Date

By Price Range	Single Family	Townhouse-Condo
----------------	---------------	-----------------

There are no year-to-date figures for inventory because it is simply a snapshot frozen in time at the end of each month. It does not add up over a period of months.

Glossary of Terms

A research tool provided by the Colorado Association of REALTORS®

New Listings	A measure of how much new supply is coming onto the market from sellers (e.g., Q3 New Listings are those listings with a system list date from July 1 through September 30).
Pending Sales	A count of all the listings that went into Pending status during the reported period. Pending listings are counted at the end of the reported period. Each listing can only be counted one time. If a listing goes into Pending, out of Pending, then back into Pending all in one reported period, this listing would only be counted once. This is the most real-time measure possible for home buyer activity, as it measures signed contracts on sales rather than the actual closed sale. As such, it is called a "leading indicator" of buyer demand.
Under Contract Activity	A count of all listings Under Contract during the reported period. Listings that go Under Contract are counted each day. There is no maximum number of times a listing can be counted as Under Contract. For example, if a listing goes into Under Contract, out of Under Contract, then back into Under Contract all in one reported period, this listing would be counted twice.
Sold Listings	A measure of home sales that were closed to completion during the report period.
Median Sales Price	A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point.
Average Sales Price	A sum of all home sales prices divided by total number of sales.
Percent of List Price Received	A mathematical calculation of the percent difference from last list price and sold price for those listings sold in the reported period.
Days on Market Until Sale	A measure of how long it takes homes to sell, on average.
Housing Affordability Index	A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and median income by county.
Active Listings	A measure of the number of homes available for sale at a given time. The availability of homes for sale has a big effect on supply-demand dynamics and home prices.
Months Supply of Inventory	A measure of how balanced the market is between buyers and sellers. It is expressed as the number of months it would hypothetically take to sell through all the available homes for sale, given current levels of home sales. A balanced market ranges from 4 to 7 months of supply. A buyer's market has a higher number, reflecting fewer buyers relative to homes for sale. A seller's market has a lower number, reflecting more buyers relative to homes for sale.
